Atlas Shoulders Burgin McDaniel Line

Audio Professionals Add BMD Products to Their Mix

Wimberley, TX – December 12, 2008 – Atlas Pro Audio, a retailer, distributor, and manufacturer of professional audio equipment, has been appointed sole worldwide distributor for Burgin McDaniel Design, a Texas manufacturer of boutique analog audio gear.

Nathan Eldred, CEO of Atlas Pro Audio, stated, "We are looking forward to working very closely with designers Kevin (Burgin) and Travis (McDaniel) and, given their track record, expect some really great things from them." A following has already developed for their debut product, the Komit, a 500-series compressor/limiter which was released earlier this year.

Kevin Burgin, who heads up Burgin McDaniel Design, said "We all are excited to have Atlas helping us with distribution. Atlas came to us after hearing the buzz and we realized that they're a perfect match to expand our channel presence. We've had a great year and are looking forward to Nathan's help in making 2009 even better." In addition to their custom work for studios, musicians and manufacturers, Burgin McDaniel is answering the call for a new product that will be released early in 2009 and distributed exclusively by Atlas Pro Audio.

About Burgin McDaniel Design

Burgin McDaniel Design is a boutique manufacturer of analog audio products for engineers and musicians. Their designs are seen in some of the world's most prestigious pro audio products and their BMD-badged lines are notable for their exceptional build quality and superior sonic performance. Based in the pro audio hamlet of Wimberley Texas, Burgin McDaniel Design is dedicated to best in class solutions for their customers.
